MIMORE

The MIMORE tool enables researchers to investigate morphosyntactic variation in the Dutch dialects by searching three related databases with a common on-line search engine. The search results can be visualized on geographic maps and exported for statistical analysis. The three databases involved are **DynaSAND**, **DiDDD** and **GTRP**.

Go to [MIMORE Search](#)

- **Dynamic Syntactic Atlas of the Dutch Dialects**
The data in DynaSAND, the dynamic syntactic atlas of the Dutch dialects (<http://www.meertens.knaw.nl/sand/>), were collected between 2000 and 2005 by oral interviews (fieldwork and telephone) in about 300 locations across The Netherlands, Belgium and a small part of north-west France. Dialect speakers were asked to judge and/or translate some 150 test sentences. DynaSAND makes available the full recordings and transcriptions of these interviews. Together, the DynaSAND data cover the syntactic variation in the Dutch language area in the left periphery of the clause (the complementizer system and complementizer agreement), variation in subject pronoun form depending on syntactic position, subject pronoun doubling, cliticization on YES/NO, the reflexive system, fronting constructions (Wh-clauses, relative clauses, topicalization), word order and morphological variation in verb clusters, negation and quantification.
- **Diversity in Dutch DP Design**
The data in DiDDD (Diversity in Dutch DP Design; <http://www.let.uu.nl/~Huib.Kranendonk/personal/contact.html>) were collected between 2005 and 2009 with oral and written interviews in about 200 locations in the Dutch language area, with a methodology highly parallel to DynaSAND. The data involve translations of and judgements on test sentences. For 29 interviews there are sound recordings which have been lined up with their transcriptions. The DiDDD data cover the morphosyntactic variation within nominal groups, in particular possessives, partitives, noun ellipsis, the demonstrative system, the numeral modification system, what-for constructions, quantitative er, adjectival inflection, negation and exclamatives.
- **Goeman, Taeldeman, van Reenen Project**
The data in GTRP (Goeman, Taeldeman, van Reenen Project; <http://www.meertens.knaw.nl/mand/database/>) were collected between 1979 and 2000 with oral interviews in about 600 locations in the Dutch language area. Informants were asked to translate words or short sentences. Part of the transcriptions have been lined up with the sound recordings. The morphological data in GTRP include plural forms of nouns, diminutives, gender on nouns and adjectives, comparatives, superlatives, verbal inflection including participles, subject, object and possessive pronouns.

Search options

The screenshot shows a web browser window with the title "MIMORE" at the top. The address bar displays the URL "http://www.meertens.knaw.nl/mimore/search/". The browser's toolbar includes standard icons for back, forward, and search, along with links to various services like Tijdregistratie, UB Utrecht, Ned-BA-UTR, Veldwerk Edisyn, Edisyn Search Engine, Doubling SURF, MyUU, Metis, Gmail, NS, Intranet, Doodle, BritishLib, Tel, Verkeer, BNTL, Monit, DiaSyn, and Edisyn.

The main content area is titled "Meertens Instituut → MIMORE" and features a "MIMORE Search" section. It includes a "perform new search" button and a message stating "no items in your virtual collection". Below this, there are several search and presentation options listed in a vertical stack:

- Geographic Conditions : no restrictions
- Resources & Limits : no restrictions
- Search for Text
- Search for Tags
- Search for Syntactic Phenomena
- Presentation : table with results

At the bottom of the search interface, there are three buttons: a checkbox labeled "Clear Cache", a "Reset all" button, and a "Search" button.

Demo: Research questions

- The Standard Dutch [non-neuter] relative pronoun and distal demonstrative has the form ‘die’ (that, those).
- We know that there are dialects that have ‘dien’ as a relative pronoun and/or as a distal demonstrative.
- We would like to know if there is a correlation between ‘dien’ as a relative pronoun, ‘dien’ as a demonstrative preceding a noun, and ‘dien’ as a demonstrative in elliptical constructions.
- The linguistic question behind this search is what the ‘-n’ on ‘die’ is: case, phonologically determined, etc.?

Optional restrictions on the search

The screenshot shows the MIMORE search interface with the following sections:

- MIMORE Search**: The main title bar.
- Geographic Conditions : no restrictions**: A red header section.
 - No geographical restrictions defined.
 - Regions tab is active.
 - Provinces tab is visible.
 - Countries tab is visible.
 - Manual Input tab is visible.
 - Current Selection tab is visible.
 - Reset button.
 - List of regions and provinces:

Available operations on search results

The screenshot shows the MIMORE Virtual Collection interface. At the top, there's a navigation bar with 'Meertens Instituut → MIMORE' and a search bar with 'perform new search'. Below that, it says '3 items in your virtual collection'. A table lists three search results:

#	nr	Title	Description	Items	Created
<input checked="" type="checkbox"/>	1	Relative pronoun 'dien' - SAND	165 results from search for text 'dien' and tag 'Pron(rel)' in sand	60	Sun, 12 Jun 2011 19:17:20 GMT
<input checked="" type="checkbox"/>	2	Demonstrative 'dien' + N - GTRP	283 of 613 results from search for syntactic phenomen 'Die draad is veel te lang' in gtrp	283	Sun, 12 Jun 2011 19:36:45 GMT
<input checked="" type="checkbox"/>	3	Demonstrative 'dien' with ellipsis - DIDDD	81 of 231 results from search for text 'dien' in diddd	81	Sun, 12 Jun 2011 19:48:00 GMT

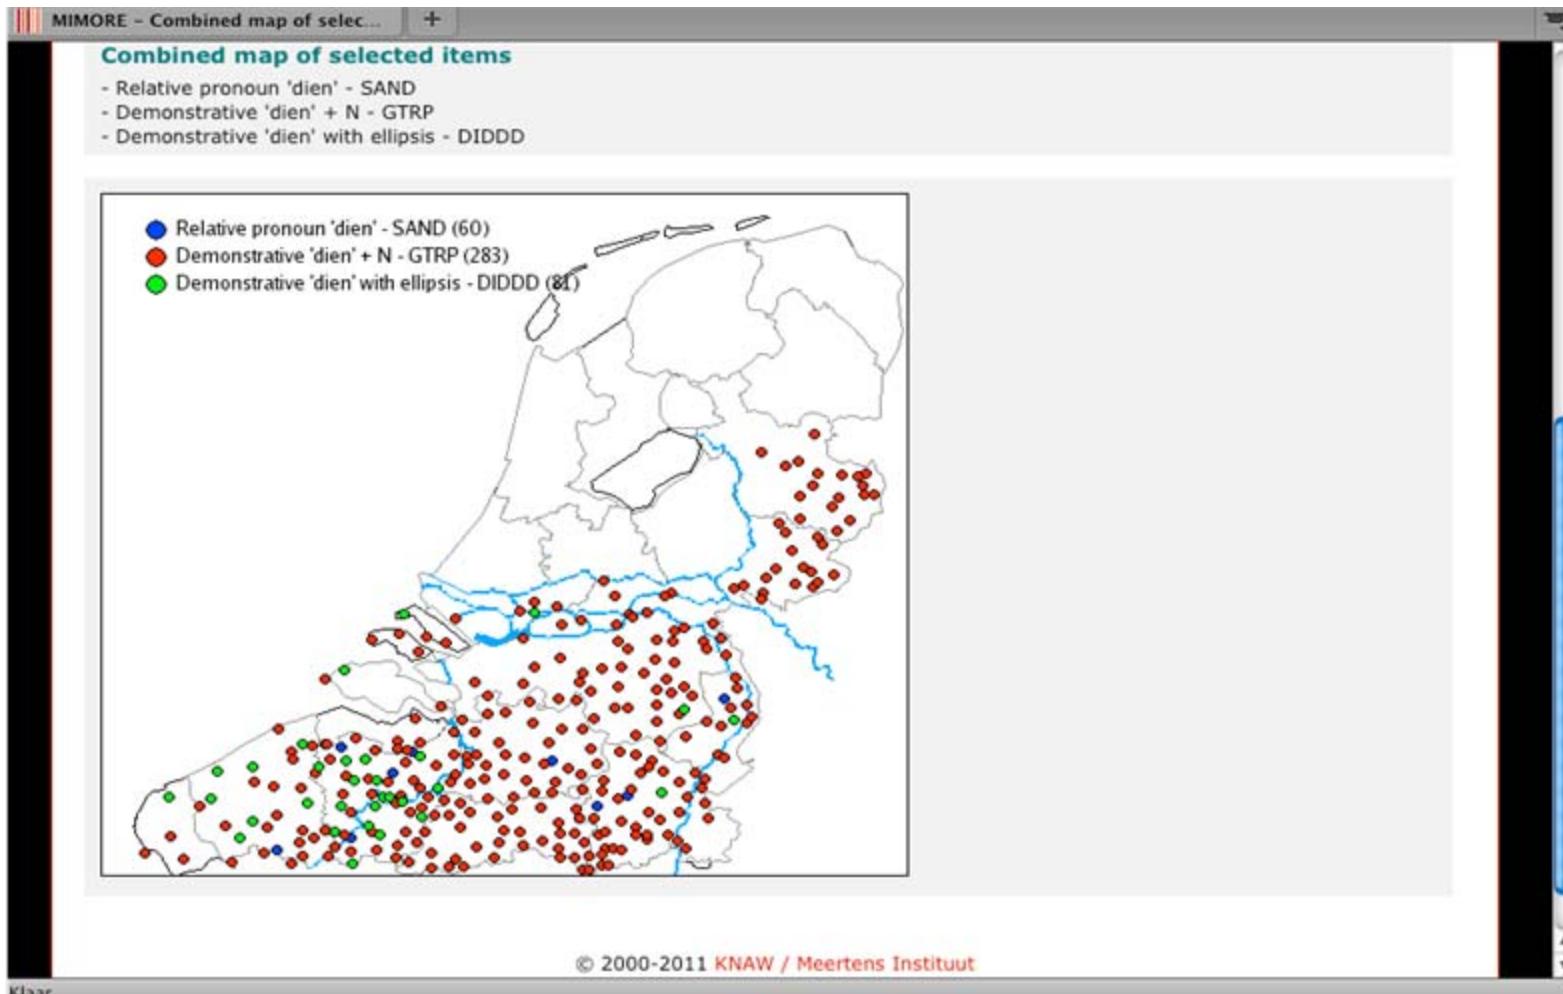

Below the table, there's a checkbox labeled 'With selected item(s):' followed by icons for a trash can and a globe.

At the bottom, there are three buttons for 'Copy & Merge' operations:

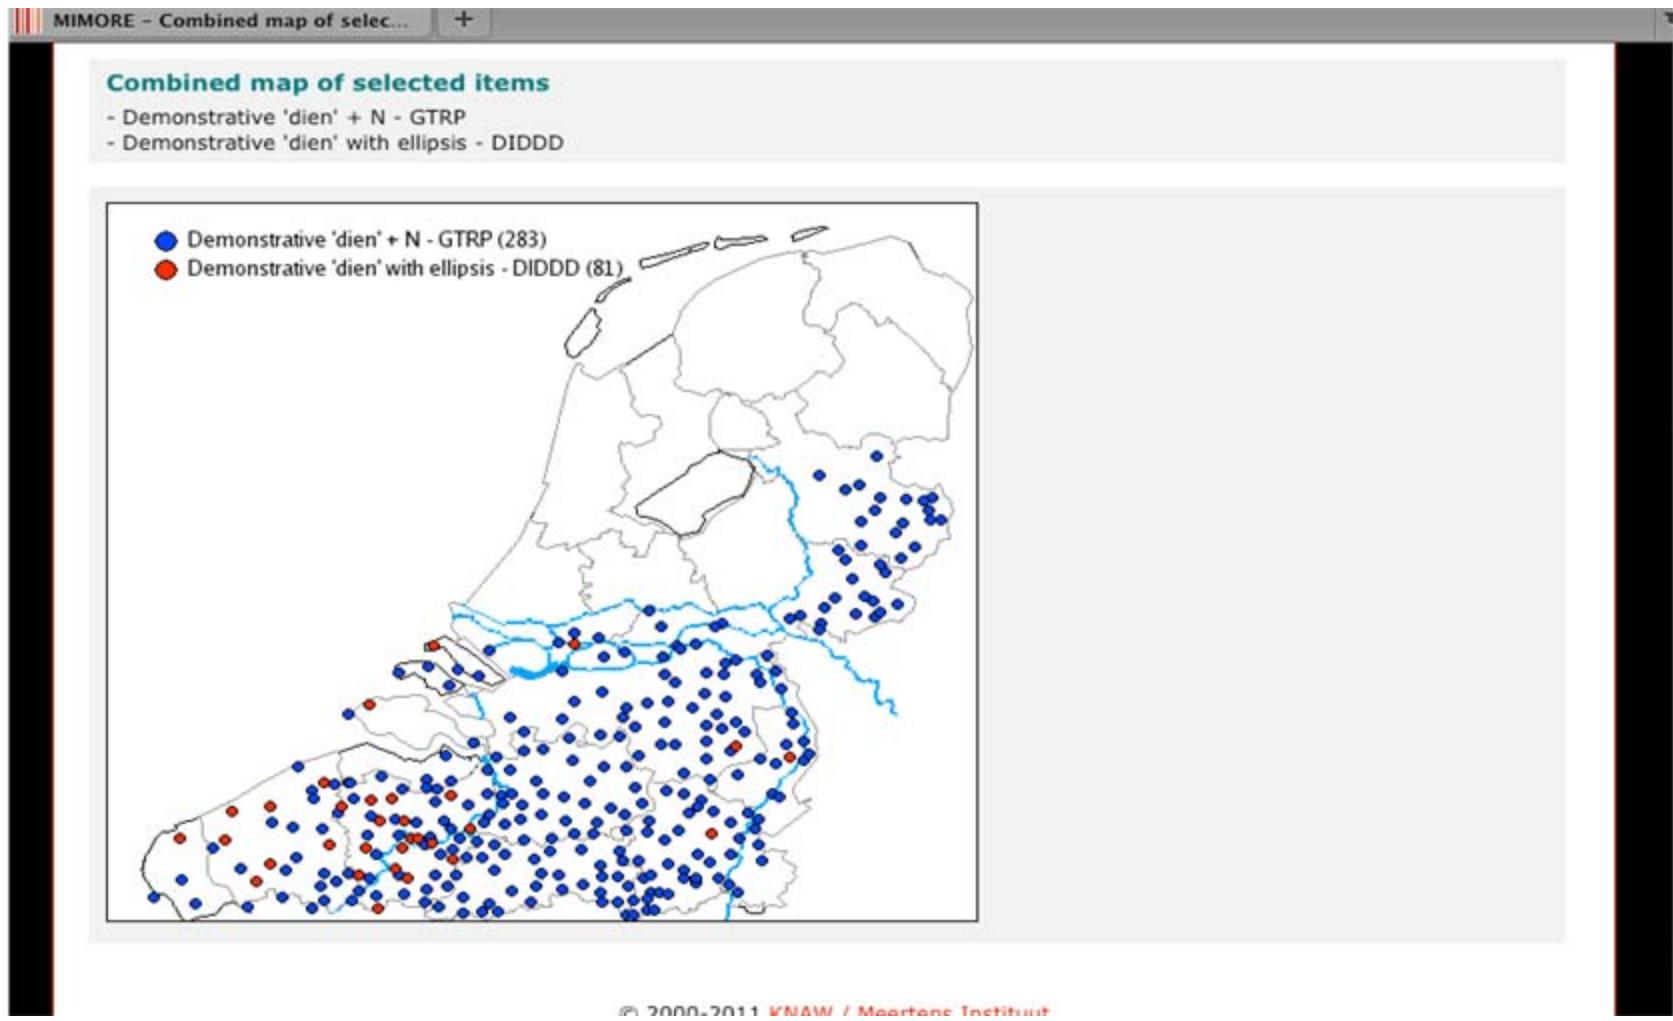

- Copy & Merge - Union**: Create a new item as the union from selected items. Button: 'Create Union'
- Copy & Merge - Intersection**: Create a new item as the intersection of location from selected items. Button: 'Create Intersection'
- Copy & Merge - Complement**: Create a new item as the relative complement of the intersection of location in the union of selected items. Button: 'Create Complement'

In the bottom left corner, it says 'Klaar'.
