for the Humanities and the Social Sciences
in the Netherlands

Open Access to data is best served by a general rule of “Open Access unless specified otherwise”.

All necessary exceptions (*for instance related to privacy, property rights belonging to private parties, particular expertise, security*) will easily be dealt with according to a ‘bill of fare’: a route to different levels of information tailored to the different target groups and to specific scientific domains, in the event that the Open Access policy is in conflict with other principles.

NL

CLARIN-NL offers

• Access to research data

• Support for research projects

• Support for other researchers

• Support for Open Access

• Support for Open Data

• Support for Open Access Panels

• Support for Open Data Panels

- CLARIN-NL participated

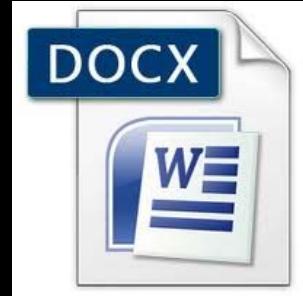

organised at SDH2010

(October 20th, 2010, Vienna).

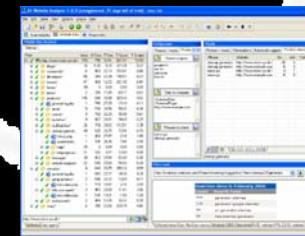

Yes, but CLARIN believes that there is more.....
